Increase driver efficiency by incentivising them through a gamified experience on the driver app

Open new revenue streams from your existing resources by enabling service types at the click of a button

Introduction

- Consumers are now used to quick contactless deliveries with flexibility in terms of delivery windows. Delivery drivers also need the best app to help them deliver with more efficiency.

- LogiNext for F&B is an end to end platform to take care of all delivery automation needs- right from easy integration with existing IT systems to generating trip plans through route optimization and communicating precise ETAs to the end customers.

- LogiNext makes it easy for your operations team to get a single screen view of ops along with real time tracking of deliveries to achieve business SLAs.

Technical features and capabilities

Smart ETA™
Factor in time of wait time, transit location holidays, route conditions to show a precise delivery time to the end customer at the time of placing an order

Smart Route™
Advanced route optimization for efficient trip planning which is great for the business and the environment. Reduced distance traveled per delivery translates into quicker deliveries and also less fuel usage which reduces GHG emissions along with delivery costs.

Bulk pickup and deliveries
Getting a custom delivery done at the same place? Bulk pickup (multiple items) and deliveries can be convenient for the driver to deliver the product with just a single sign from the warehouse manager or the place of delivery.

Hotspots
Get the maximum number of orders delivered from your limited resources by assigning drivers to areas where demand is more and driver supply is less.

Tracking Links
Trigger delivery time communication links to the end customer in your custom branding

Geofencing
Set location based alerts and notifications to notify operation managers and end customers

ePOD and eSigns
Check and authenticate all deliveries at the point of exchange with secure ePODs and eSigns, along with live customer feedback.

Gamified Delivery Driver Management
Turn drivers into entrepreneurs with a gamified leaderboard on the driver app to improve delivery driver efficiency

Why choose LogiNext?

LogiNext's end-to-end platform with highly configurable features and a plug&play nature owing to the easy API integrations make it the preferred choice for enterprise brands looking to digitize, optimize and automate delivery management along with delivering a great customer experience.
